Professional Summary

WordPress and web developer with 3.6+ years of experience building, customizing and maintaining client websites across WordPress, Shopify, Wix, Squarespace and Unbounce. Full-stack WordPress specialist covering custom plugin and theme development, PHP debugging and pixel-accurate implementation of Figma designs. Works directly over SSH and uses AI-assisted development (Claude Code) to ship custom plugins faster. Has built and delivered 300+ projects end to end, owning client communication from requirements to delivery and ongoing support.

Core Skills

Area	Skills
Platforms and CMS	WordPress (Expert), WooCommerce, Shopify and Shopify Plus, Wix (Velo), Squarespace, Webflow, Unbounce
Page Builders	Elementor Pro (loop grids, nested accordions, custom interactions), theme and template customization
WordPress Development	Custom plugin development, custom theme development, custom post types and taxonomies, meta boxes, shortcodes, WP-Cron jobs, WPCode snippets, PHP debugging

Area	Skills
WooCommerce	Large-catalog product management, API-driven price and stock sync, custom taxonomies, bulk data cleanup with backups, B2B quote-to-order workflows, custom order statuses, shipment tracking and PDF invoicing, rate calculation, role-based access
Languages and Frameworks	PHP, Laravel, JavaScript, Shopify Liquid, HTML, CSS
Shopify	Liquid sections, theme customization, Draft Orders GraphQL API, custom cart and checkout, product option and configurator apps (TEPO), metafields and metaobjects, gated customer portals
Third-Party Integrations	Twilio SendGrid forms, Klaviyo (flows, lists, campaigns), Viral Loops, Yotpo, Gravity Forms, Google Analytics 4, Google Tag Manager, Meta Pixel, Google Apps Script, Vercel serverless APIs, supplier and shipping APIs, Yoast SEO, LiteSpeed Cache
SEO and Accessibility	WCAG 2.1 AA audits and remediation, JSON-LD schema markup, technical SEO, bulk SEO fixes via CMS and code
Security	Malware investigation and cleanup, WordPress plugin code audits, credential and access hardening
Server and DevOps	Git version control, SSH, WP-CLI, cPanel, phpMyAdmin, DNS and site migrations; hosting on SiteGround, GoDaddy Managed WordPress, Cloudways, ScalaHosting SPanel, A2 Hosting
Design and QA	Figma-to-code implementation, responsive builds, cross-browser QA, performance reviews
AI-Assisted Workflow	Claude Code, Cursor (Remote-SSH) for faster custom plugin and site builds
Professional	Client communication, requirement gathering, problem-solving, debugging, handling multiple client sites at once

Key Capabilities

- **Custom plugins:** Build WordPress plugins for API-driven product sync, data-quality automation, custom FAQ systems and admin tooling.
- **WooCommerce:** Run catalogs of 150,000+ products with automated sync, taxonomy-based classification, safe bulk updates with backup tables, and B2B quote-to-order planning.
- **Shopify engineering:** Custom pricing, cart and checkout logic on Shopify Plus using the Draft Orders API and a serverless backend, plus Liquid sections and gated portals.
- **Third-party integrations:** Connect stores and sites to Twilio SendGrid forms, Klaviyo flows, Viral Loops referrals, Yotpo reviews, Gravity Forms, GA4, Google Tag Manager, Meta Pixel and supplier APIs.
- **Automation:** Cron-based sync jobs, Google Apps Script backends and serverless endpoints that remove manual work.
- **Accessibility:** Audit and fix sites to WCAG 2.1 AA across WordPress, Shopify, Squarespace and Unbounce.
- **Structured data and SEO:** Generate and deploy JSON-LD schema sets (Product, FAQPage, HowTo, BreadcrumbList) and bulk on-page SEO fixes at scale.
- **Security and recovery:** Trace malware to its source, remove malicious plugins, audit third-party plugin code and tighten access controls.
- **Delivery:** Pixel-accurate Figma builds, migrations, QA and ongoing maintenance with clear client communication.

Professional Experience

Web Developer, Syndell Technologies

Ahmedabad, India | May 2023 – Present

- Build, customize and maintain WordPress websites end to end, from theme and UI implementation to custom functionality, database work and performance.
- Develop custom WordPress plugins and themes to client requirements, extending core functionality beyond off-the-shelf solutions.
- Engineer Shopify and Shopify Plus solutions, including Liquid sections, custom cart and checkout logic, and serverless API integrations.

- Manage large WooCommerce catalogs with automated, API-driven product sync and data-quality checks.
- Integrate client sites with Klaviyo, Viral Loops, Yotpo, Gravity Forms and analytics tools to automate lead capture, email flows and tracking.
- Audit and remediate websites to WCAG 2.1 AA on WordPress, Shopify, Squarespace and Unbounce.
- Implement JSON-LD schema and bulk SEO fixes at scale, including code-driven fixes on Wix through Velo.
- Deliver client projects on Wix, Squarespace and Unbounce, choosing the platform that fits each project.
- Translate Figma designs into pixel-accurate, responsive implementations.
- Administer hosting across SiteGround, GoDaddy, Cloudways, ScalaHosting and A2 Hosting, handling DNS changes and migrations through cPanel, SSH, WP-CLI and phpMyAdmin.
- Use Git for version control and direct SSH access with Claude Code to build and deploy custom plugins and site changes faster.
- Investigate WordPress malware incidents, remove malicious plugins and audit third-party plugin code for tampering.
- Run ongoing reviews, maintenance and troubleshooting so client sites stay secure, fast and bug-free.
- Manage client communication by email: gather requirements, share status updates and resolve issues.
- Serve as the team's go-to person for diagnosing complex WordPress and site-level problems.

Backend Developer, ColorHunt (Laravel project)

Syndell Technologies

- Contributed server-side logic and application functionality to ColorHunt, a Laravel-based web application.
- Worked in a Laravel / PHP environment, applying backend practices beyond typical WordPress work.

Selected Projects

Over 300 projects built and delivered end to end. The projects below are only a selection.

Portfolio: https://yaswanth-portpolio.vercel.app

WordPress and WooCommerce

- **DHE Parts** (WordPress, WooCommerce) – B2B tractor and heavy-equipment parts store with roughly 150,000 products. Built a custom plugin and cron-based sync that keeps prices and product data in step with a supplier API within daily call limits, with a verify mode that re-checks and corrects product classification. Cleaned about 22,000 mis-tagged products using backup tables, and scoped a B2B quote-to-order workflow (quotes, shipment tracking, PDF invoices, custom order statuses). Stack: custom taxonomies, Yoast SEO Premium, LiteSpeed Cache, Elementor.
- **Health Connect Group** (WordPress, Elementor Pro) – Australian call-centre services website. Built loop grids, trust bars and hero sections, a custom FAQ system (PHP meta box, shortcode and accessible details/summary output), Gravity Forms notifications and optimized WebP media with full alt-text metadata, targeting WCAG 2.1 AA with minimal third-party plugins.
- **Enlace Ganadero** (WordPress, Elementor) – Spanish-language pre-launch site for a Venezuelan digital livestock marketplace, with Twilio SendGrid sign-up forms integrated to capture launch-notification leads.
- **Zoundslike** (WordPress) – Marketing website for an English-speaking practice app with 100K+ Play Store downloads, with App Store and Google Play download links, FAQ and blog sections and Slider Revolution animations.
- **Mind and Body Wellness** (WordPress) – Multi-state telehealth practice site, covering ADA and WCAG accessibility fixes alongside SEO work.

Shopify

- **Enwolt Bikes** – EU electric-bike and moped store (ENGWE and VARUN brands). Shopify theme development plus JSON-LD structured data (Product, FAQPage, HowTo, BreadcrumbList) rolled out across the catalog for rich results.
- **DirtyBoy** – Shopify pre-launch teaser with a custom Liquid section, a Viral Loops referral system, Klaviyo welcome and referral flows, and a Google Apps Script backend serving a live signup counter.
- **Biomiq Skincare** – Gated Inner Circle and Retailer portals on Shopify driven by Klaviyo customer data and metaobjects, with Yotpo reviews.
- **The London Tea Merchant** – WCAG 2.1 AA accessibility audit and remediation of the Shopify storefront.
- **Thankful Greetings** – SEO, AEO and GEO optimization across a 279-page Shopify store: meta data, image alt text, schema and a full site audit.

Wix, Squarespace and Security

- **Halcon Marketing** (Wix) – Bulk SEO fixes across hundreds of pages using Velo code and CMS collections: meta titles and descriptions for 181 pages, about 324 image alt texts, and canonical and breadcrumb schema for 236 pages.
- **Mylk and Hummus** (Squarespace 7.1) – ADA and WCAG 2.1 AA accessibility audit and remediation.
- **WordPress security work** – Investigated a multi-site WordPress malware campaign across client sites, reverse-engineered the malicious plugins and drove remediation. Built a repeatable static-analysis workflow that risk-scores commercial plugin distributions for tampering.

Education

Bachelor of Science (B.Sc.) in Computers, graduated 2022
